

Remote access to your central control is now as convenient as the Internet, with mobile control. This software runs on your central control computer to provide remote irrigation control via a web-enabled device or smart phone.

Rain Bird® MI Series™ mobile controllers are designed to work on a smartphone or tablet with Internet connectivity and offer greater remote operation capabilities than anything else available.

When connected to the Internet, up to nine (9) remote users can simultaneously control sprinklers and programs, review system activity or directly change settings on both sprinklers and irrigation programs. All activity is logged at the central control for convenient review.

MI Series mobile controllers now also include the MI FREEDOM user interface. MI FREEDOM provides two smartphone interfaces for users to implement traditional FREEDOM commands: 1) Handheld radio keypad for users with handheld radio keypad experience. 2) Soft keyboard interface for use of The FREEDOM™ System commands on a standard smartphone virtual keyboard.

SYSTEM REQUIREMENTS

- Central control system computer must be running Windows® XP, Windows 7, Windows 10 32 bit or higher.
- Requires an Internet connection to the central control.
- Requires a web-enabled smart phone or tablet with a data plan.
